Professional Experience

UX Designer, Full-stack Developer, Co-owner @ ListingDesigner

August 2024–Present, Groningen

Co-founded a SaaS platform for creating product listings. Led the end-to-end UX design process, built a scalable design system, and developed the production application.

- Designed 100+ screens and states including onboarding, auth, billing, settings, and product workflows.
- Built a scalable Figma design system with 50+ components and variants.
- Created user flows, wireframes, and prototypes to validate concepts pre-development.
- Built the production app in Next.js, including frontend, backend, APIs, and database.
- Defined product direction with the co-founder and iterated based on feedback from a 250+ user beta.

UX / UI Designer, Web Designer @ BrandMonks

August 2022–Present, Groningen

Responsible for UX/UI across client projects spanning web, branding, and digital product interfaces, with a strong focus on design systems.

- Led UX/UI design across websites, digital products, branding, and print assets.
- Created user flows, wireframes, and interactive prototypes for client validation.
- Developed scalable design systems in Figma focused on consistency and reuse.
- Conducted user research and translated requirements into structured design solutions.
- Collaborated with developers and monitored them to ensure accurate and efficient implementation.
- Mentored design interns and provided constructive feedback.

UI Designer, Web Designer Intern @ DSGN

February 2022–February 2023, Groningen

Worked on end-to-end client projects combining UI/UX design, marketing collaboration, and development exposure.

- Delivered UX/UI design for multiple client projects from concept to completion.
- Created user flows, wireframes, and interface designs for web products.
- Collaborated on 10+ concept-driven projects with the marketing team.
- Led internal Figma training sessions to other designers on professional design workflows and best practices.
- Supported junior interns and contributed to day-to-day design execution.

Web Designer Intern @ Het Bureau

January 2021–January 2022 Utrecht

Contributed to web design projects in a multidisciplinary team, gaining foundational experience in client-facing design work.

Projects

ListingDesigner

2024–Current Groningen

SaaS platform for creating marketplace product listings. Designed and built the product from concept to production, including UX design, design systems, and full-stack development using Next.js.
